

FARM AND FISHFIRE.

—The question is not what could be done if we had certain other things, but what can we do to make the most of what we have.

—A sheep wolf fed and protected during the winter will yield in the spring two pounds more of wool than one that has been half starved.

—When butter is gathered in the churn in granular form, it is never overchurned. Founding it after it is in lump or large mass will over-churn it.

—Warm water put in the cellar on cold nights to prevent freezing, should be in closed vessels, which warm up the air, making it drier without evaporating moisture into it.

—Green Sponges Cake. Two teaspoons of sugar, one of cream, two of flour, four eggs, one teaspoonful of baking powder, and one of cream of tartar, beaten, take quickly.

—Never set the lamp upon a red table-cloth; if you can not find time to make a green lamp-nut, put a piece of green card-board under the lamp, and you will find that much more agreeable to the eyes than that from the red cover.

—Creamed Apples.—Pare your fruit and either scald or bake it until sufficiently soft to pulp through a colander, sweeten to taste, fill your glasses three parts full with it, then plentifully sprinkle in some powdered cinnamon, put a good layer of rich whipped cream on the top and a white sugar over it.

—A little acid water will make water give it a reliable flavor, and induces a cow to drink more, besides affording some additional nourishment. If the temperature of the water is first raised to nearly or slightly above 100° F., it is all the better, since the cow will drink more warm water than she will cold.

—To prepare zante currants for cake, put them in a colander, set the colander in a large pan of water, and unless there are stones in the soil and stems will all settle in the pan. If you wash the currants thoroughly in this way, you will be surprised at the results, as it takes less time and water than in the old way, and is so much easier to do than the old way.

—The house of a well-bred, well-fed hog can be kept in good condition by a small part of his good weight. An animal of this nature, when necessary, gives a great deal of fat, but the importance of making it well matted to keep it from complete degeneration is self-evident to any thoughtful person; hence, inasmuch as the natural tendency of the hog is to fatten, it is necessary to use the most nutritious feed to the exclusion of fattening food.

—It would hardly pay the farmer to engage in the poultry business beyond the keeping of two or three dozen for family use, unless there should be some other place where he could make a special business of looking after the poultry and like to do it. Sometimes the service of a good, steady boy, who is a natural farmer, may be secured at a small cost, and all the time may be profitably employed in caring for 200 or 300 hens, or if he be experienced, probably 500 or 600. In embarking in the business it is best not to start out on too large a scale.

ABOUT MANURING.

The Use of Commercial Fertilizers and the Flowing Order of Crops.

In opening this article I submit these general propositions: First, to grow a crop of any kind in the best way possible, to have sufficient plant food in the soil in an available form to produce a maximum crop. Second, this may be obtained by the application of manure or commercial fertilizer, or both, in such quantities and in such a way as to make the plant food in the soil, in an available form to produce a maximum crop. Third, this may be obtained by the application of manure or commercial fertilizer, or both, in such quantities and in such a way as to make the plant food in the soil, in an available form to produce a maximum crop.

—I am in favor of "green manuring," so far as it can be practically advantageously. The trouble with green manure is that there is never enough. The trouble with green manure is that there is never enough. The trouble with green manure is that there is never enough.

—I am in favor of "green manuring," so far as it can be practically advantageously. The trouble with green manure is that there is never enough. The trouble with green manure is that there is never enough. The trouble with green manure is that there is never enough.

OLD SQUIRE BEASLEY.

The illustrious figure of the famous Squire Beasley of America.

The village of Aberdeen, O., directly opposite this city, has become famous within the last quarter of a century as the birthplace of a famous Squire. More couples are married there in a year than in many large cities of the country. It is the haven of runaway lovers from Kentucky, although couples go there from Ohio, Indiana, Illinois, and even New York. Aberdeen is a pretty place of about nine hundred inhabitants. It is situated on the Ohio river, sixty miles above Cincinnati, and is reached by steamer and ferryboat. The town is a leading tobacco market. Runaway marriages have become so frequent at Aberdeen that the people pay no attention to them. There are sometimes six or seven weddings a day. The veteran marrying "Squire" is Massey Beasley, who is now seventy-seven years old. He has held his post for many years, and has been a steady and successful business man.

—Squire Beasley's office has furnished many sensations which never got into the newspapers. On two or three occasions he has been interrupted by the arrival of pursuers who had come to the wedding. The age of applicants for his services makes no difference to Mr. Beasley. He has married couples of all ages, from the young man of twenty to the old man of eighty.

—Squire Beasley is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

—Squire Beasley is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

—Squire Beasley is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

—Squire Beasley is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

—Squire Beasley is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

—Squire Beasley is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

MARRIED BELEGGED.

A sensible chapter on the pleasures and pains of matrimony.

We do not halt this compulsory competition for self-support for women as a wholesome sign, for it is not. There is a remedy that is in the hands of the young men. It is to be a good husband. It is to be a good husband. It is to be a good husband.

—A social force, tending to a better and more orderly life in the man who married, he becomes a most important agent of the state. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

—A man can marry sensibly and safely on \$10 a week. At \$20 a week he is without excuse for idleness, and at \$30 a week he is without excuse for idleness. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

—A man can marry sensibly and safely on \$10 a week. At \$20 a week he is without excuse for idleness, and at \$30 a week he is without excuse for idleness. He is a man of many talents. He is a good lawyer, a good doctor, a good farmer, and a good husband.

GIRLS AND MARRIAGE.

An Answer to an old and excellent question.

—An Answer to an old and excellent question. The old question, Why don't the girls marry? is a new one for its regular annual discussion, and the columns of the newspapers the country over are filled with it. It is even surmised that some anxious mammae are also discussing it in those lectures popularly supposed to have been originated by the late Mrs. Candie. Not only is the old question a new one, but the same old question is asked in a new way.

Times Enough to Live.

There is a young man studying law in a Texas lawyer's office, and the young man is not very regular in his habits.

Yesterday the old lawyer said:

"Why didn't I see you in court yesterday?"

"Because I wasn't there, I reckon."

"I was confined to my room with the toothache," was the response of the impatient law student.

"Come, now," said the lawyer, "good-naturedly, 'except that you will never get into the law after you have passed your examination and been admitted to the bar.'"

"A sick child," the student replied, "has been so ill that I have not been able to go to court."

"A sick child," the student replied, "has been so ill that I have not been able to go to court."

"A sick child," the student replied, "has been so ill that I have not been able to go to court."

"A sick child," the student replied, "has been so ill that I have not been able to go to court."

"A sick child," the student replied, "has been so ill that I have not been able to go to court."
